Rifat Jahan Mim

Business Analyst with 4+ years of experience in AI-assisted product development, rapid prototyping, requirement engineering, and product delivery across OTA, healthcare, fintech, and e-commerce. Skilled in product discovery, UX, wireframing, SRS/BRD documentation, market analysis, and stakeholder management, with a focus on delivering scalable, user-focused, and business-driven solutions.

WORK EXPERIENCE

Business Analyst

US-Bangla Airlines

2026.08 - Current

- Conduct AI-assisted product research, requirement analysis, and rapid prototyping using Claude AI, ChatGPT, Gemini, Cursor AI, and Lovable, while managing stakeholders to translate user expectations into effective system solutions.

Business Analyst

TechnoNext Software Ltd

2023.07 - 2026.07

- Gather and analyze requirements, preparing detailed SRS, BRD, and functional documents for clear team communication.
- Conduct stakeholder analysis and discovery sessions to align business objectives with project goals.
- Manage product scope, backlog, and delivery planning, ensuring timely execution and measurable business value.
- Perform market research and competitive analysis to identify trends, opportunities, and improvement areas.
- Define and refine UX strategies, creating wireframes and collaborating with UI/UX teams to validate business flows.
- Drive feature optimization and leverage AI & automation tools to enhance efficiency, analysis accuracy, and documentation quality.
- Collaborate closely with development and QA teams to ensure all releases meet business and technical expectations.

Jr. Business Analyst

Machine Xtreme IT

2022.01 - 2023.06

- Analyzed government RFP, RFQ, tender documents and TORs to identify requirements, assess bid eligibility, prepare compliance matrices, develop technical and financial proposals, and coordinate final e-GP submission.
- Assembled, validated, and documented detailed business requirements, including functional and non-functional specifications, proposed architecture, UML diagrams, and user guides.
- Supervised projects, coordinated cross-functional teams, managed timelines, scope, budgets, and facilitated Agile sprints and team communication.
- Analyzed requirements, identified risks, and proposed effective, actionable solutions.
- Created marketing and advertising content for campaigns, proposals, and business presentations.
- Contributed to UI/UX design and prototyping, applying design principles such as typography, layout, and color psychology for HRIS and government projects.
- Performed manual testing, developed test cases, and ensured product quality and compliance with requirements.

PROJECT WORKS

Vehicle Management System- USBA | Business Analyst

- Conducted AI-assisted product research, market research, and competitive analysis to identify market opportunities, industry trends, and product improvement areas.
- Leveraged Claude AI for rapid prototyping and workflow design to accelerate product validation.
